RESUME

A disciplined IB Diploma candidate and self-taught web developer with 5 years of experience in project management and technical troubleshooting . Beyond my technical background, I am a woman’s football coach and a marathon runner, roles that have developed my leadership skills, mental stamina, and ability to thrive in high-pressure, fast-paced environments. Having grown up in a culinary household with my father as a professional chef, I possess a natural familiarity with kitchen dynamics and a proactive ‘handy’ approach to service. I am a fast learner with a global mindset and a strong work ethic, currently seeking to leverage my multitasking abilities and dedication to excellence in a professional service role while preparing for an international academic career.
